ABSTRACT

In the era of globalization, the existence of electronic messaging system is considered not only as a support for operational activities of a certain organization, but also as a need of individuals to support their daily activities.

Public Internet E-mail service is the main choice of individuals to fulfill those needs, and various types of public e-mail services are now available over the Internet. Public e-mail service providers offer various types of service, ranging from free web-based e-mail services to subscription client software-based e-mail services.

The highly competitive nature of Internet businesses and an increased demand for high quality public e-mail services has created a question of how to best service the users in order to provide high customer satisfaction and win the business competition.

In the light of the above question, this study is focusing on user satisfaction analysis of public Internet e-mail services; identify current condition and what is actually needed by the users, in an effort to find answers on how to formulate a better service that serve the majority of public needs.

Keywords: Satisfaction, E-mail

Abstract ..................................................................... iv
Table of Content ....................................................... v

Chapter 1 INTRODUCTION .............................................. 1
  1.1 Background ....................................................... 1
  1.2 Problem Formulation .......................................... 2
  1.3 Objectives and Benefits ....................................... 3

Chapter 2 LITERATURE REVIEW ................................. 5
  2.1 User Satisfaction ................................................ 5
    2.1.1 Gap Approach Model ................................... 6
    2.1.2 Gap Approach Model with Difference Analysis ...... 7
  2.2 Internet E-mail .................................................. 8
    2.2.1 Methods of Access ....................................... 12
  2.3 Chi-square as a Test of Independence .................... 13
    2.3.1 Contingency Table ..................................... 14
    2.3.2 Degrees of Freedom .................................... 14
    2.3.3 Expected Frequency of Any Cell .................... 15
    2.3.4 Chi-square Calculation ................................. 15
    2.3.5 Chi-square Distribution ............................... 16

Chapter 3 METHODOLOGY OF RESEARCH ...................... 17
  3.1 Analysis Models ............................................... 17
    3.1.1 User Satisfaction Level of Internet E-mail Services .. 18
3.1.2 User Satisfaction Level and Type of E-mail Services...19
3.1.3 Service Factors Analysis ........................................20
3.1.4 Comparative Analysis of User Satisfaction and
              Expectation ...................................................21
3.1.5 User Profile Specific – Satisfaction Level ..............22
3.2 Data Collection ....................................................23
    3.2.1 Questionnaire Design ........................................27
    3.2.2 Type of E-mail Service and Access .......................29
    3.2.3 User Profile ..................................................30
    3.2.4 User Satisfaction ..............................................32
    3.2.5 E-mail Account Setup ........................................33
    3.2.6 Personal Image ...............................................34
    3.2.7 Ease of Access ...............................................34
    3.2.8 Personal Data Security .....................................35
    3.2.9 Mailbox Data Security ......................................36
    3.2.10 Customer Service Support ................................36
    3.2.11 Level of Importance ........................................37
3.3 Hypotheses ..........................................................37

Chapter 4

FINDINGS AND ANALYSES ............................................40
4.1 Data Processing ....................................................40
4.2 User Satisfaction Level of Internet E-mail services ........40
4.3 User Satisfaction Level and Type of E-mail services .......42
4.4 User Profile Specific – Satisfaction Level .................43
4.5 Service Factors Analysis ........................................48
4.6 Comparative Analysis of User Satisfaction and Expectation 50
4.7 Performance Analysis ..............................................52
