Class struggle follows the idea of Marxism. This struggle could happen between people in the upper classes and lower classes, or the rich and the poor. (Barry, 2009; Hall, 2001). This research wants to discuss how social class struggles are being shown in this movie. In this movie, the main character, John Q, struggles for his son to get the treatments in the hospital although he has no money to pay it. He believes that insurance should covered his son, but in fact the insurance would not covered. Finally John was successful to declare that there should be equality between classes and that human’s life is more important that wealth or money.
