ABSTRACT

The high percentage of alcohol users Indonesia among young generations makes me curious to discuss this topic. Because of alcohol, the behavior of young generations now become or inclined to be negative. The abuse of alcohol causes a bad effect to physical and psychological aspects of the users. Based on the research, I found that the effect of alcohol abuse in young generations is apprehensive spread of cancer and the heart attack is increasing of alcohol abuse, as well as other diseases. According to the research, the young generations actually know about the danger and the effect of alcohol abuse, however they can not avoid the reality that they have been addicted to alcohol. Some solutions to the problems are offered in this paper.
ACKNOWLEDGEMENTS

I would like to express my gratitude firstly to God, who gives me strength and comfort in writing this paper. In accomplishing it, I am particularly indebted to Mr Rudy Purwanto, M.Ed, my mentor who advised, guided, and corrected my work so that I could complete my paper on time.

I would also like to thank Dra. Iterekke, Indra Dewi, M.Hum., the dean of the Faculty of Letters and all my lectures at Bina Nusantara University. My special thanks are also addressed to all my friends for the encouragement throughout the writing of this paper. Last but not least, my greatest gratitude goes to my sisters and my beloved mother and father whose love, care and prayers encourage me to complete this paper.
